MADISON FREE CLINIC ANNOUNCES AVAILABILITY OF TELEMEDICINE

Maintaining social distancing in the time of the COVID-19 emergency

MADISON, VA March 28, 2020— The Madison Free Clinic, Inc. is pleased to announce that it has launched a telemedicine solution in order to continue to “see” patients during the COVID-19 pandemic that is sweeping the world, including here in Central Virginia. Effective immediately, our newly homebound patients will be able to check-in with their primary provider for follow-up appointments, virtual checkups, to refill prescriptions and certain other services*.

Executive Director Brenda Clements said, “We are excited about this opportunity to help our patients through this crisis and our hope is that this will open the way for us to provide even more opportunities to help our patients in the future.”

New and renewing patients can learn more by visiting <https://madisonfreeclinic.org/telemedicine>. There is no charge for this service.

The staff, patients and volunteers of the clinic are extremely grateful to our partners for their continued support during this unprecedented and challenging time.

The Madison Free Clinic, Inc. is 501(c)3 nonprofit organization providing medical, dental, vision and nutrition services to uninsured adults living in Madison County who meet certain financial qualifications. For more information, please visit <https://madisonfreeclinic.org>
